Summary

Motivated web developer with experience in creating accessible, user-friendly web applications. Passionate about leveraging technology to solve problems and continuously improving my craft. Strong communication and collaboration skills is a key in my tool kit.

Education

The Odin Project (TOP) — Front-End Web Development

January 2023 – Present

Technical Skills

- **Languages, Frameworks & Tools:** JavaScript, HTML (Semantic), CSS3, React, Next.js, Git/GitHub, Vitest
- **Additional Skills:** Responsive Web Design, Firebase, Local Storage, Unit Testing (React Testing Library)

Experience

- **Web Accessibility:** Implemented WCAG 2.1 standards for inclusive web experiences.
- **Next.js Proficiency:** Built server-rendered React apps, leveraging API routes, middleware, and performance optimization.
- **API Integration:** Seamlessly connected frontend and backend via RESTful APIs.
- **Authentication Systems:** Developed secure user authentication systems.
- **Styling:** Utilized Tailwind CSS and Material-UI for professional designs.

Projects

- [Financial Management Website](#): Freelance project for Yottanet Technology, focusing on CSS3 and responsive design.
- [E-Commerce Platform](#): Scalable React application with dynamic product pages, cart functionality, and authentication.
- [Golf Estate Assembly Website](#): An open source church project purposely for rendering information about the church.
- [Portfolio Website](#): This is a personal project design to showcase my work, expertise, contact information.
